

As Historians we will:

Explore some of the big events from British and world history some of which were great, some of which were pretty ghastly!

We will begin by looking at some of the big events we have seen in our lifetimes such as family events and starting school.

We will then go on to find out about some big events in British and world history, such as the Gunpowder Plot, the Great Fire of London, the sinking of the Titanic, World Wars I and II and the first moon landings.

Great and Ghastly Events

As Geographers we will:

Use world maps, atlases and globes. We will track the journey of the titanic on its disastrous maiden voyage.

As Designers we will:

Apply our knowledge of properties of materials to design, build and evaluate our own boats.

As Scientists we will:

Investigate floating and sinking, considering the structural properties and materials used in boat building. We will identify and compare the suitability of a variety of everyday materials including wood, metal, plastic, glass, brick, rock, paper and cardboard.
